| Description | The CPAPMax is a fully adjustable pillow that allows users to customize both height and firmness, delivering cooling comfort while promoting improved neck support and airway alignment. By reducing mask shifting, leaks, discomfort, and pressure points that can disrupt sleep, it helps patients stay comfortable and consistent with CPAP therapy. | The CoolPAP is a travel-friendly CPAP pillow that rolls into a compression pack for easy packing or carrying. It delivers cooling comfort, improved neck support, and mask clearance. Its memory foam design ensures patients can maintain effective therapy positioning at home and while traveling. | The CPAP CoolFlex pillow is designed for custom neck and sleep positioning support. Easily maintain improved head and neck alignment throughout the night by adjusting the flexible neck support and customize the mask clearance to reduce interference and pressure from equipment. |

| <p>The Core CPAP Pillow helps prevent pressure point soreness and air leaks. Although designed by a CPAP user, it is also ideal for those who are required to sleep on their side or stomach for other reasons such as pregnancy, fibromyalgia, and chronic pain. Its shape and quilted side panels create a distinct edge, allowing the mask and hose to comfortably hang over the side of the pillow. This helps prevent mask/pillow interference and keeps the CPAP mask from moving or placing excessive pressure on the face. Made in the USA.</p> | <p>Created by Dr. Raj Kakar, the CPAP pillow features a contoured shape with side cutouts that help reduce mask pressure, prevent air leaks, and support comfortable side and back sleeping without disturbing CPAP tubing.</p> |
